Auditorio-Museo PetStar LEED PLATINUM certification

PetStar is a Coca Cola's owned PET recycling services Company
The largest food D-grade PET bottle recycling plant in the world

Under Earth Lab's leadership, the Museum- Auditorium obtained LEED BD+C NC
PLATINUM Certification, the maximum level of certification a project can achieve,
becoming the 1st Museum in Latin America to do so, and worlds first as a complex

Most certainly also the 1sr ALL EARTH WALLS building to do it
The Auditorium is a 15 m diameter by 15 m high poured earth cylinder with 0.45 m thick walls
and the Museum is built with compressed earth bricks (CEB) all-around

A great earth experience !
