13.06-17.06.2022

15.06 | 17h00-18h00 (UTC +2)

SAME SAME BUT DIFFERENT

Nicolas Coeckelberghs

<https://ethz.zoom.us/j/67622888576>

Nicolas Coeckelberghs is one of the four co-founders of BC architects & BC studies & BC materials. BC stands for Brussels Cooperation and points to how BC grew - embedded within place and people. It is an award-winning office, and is teaching at KULeuven University (BE), UHasselt University (BE), and has been teaching at EiABC Addis Ababa University (ET), ETH Zurich (CH), TU Stuttgart (DE), TU München (DE). The collaborators work with age-old materials such as earth, straw and natural stone. But what they do with them and how, is radically different. What if a city yard, for example, became the largest harvesting site for building materials? For the firm, the large quantities of soil moved here are the raw material for circular building materials. Nicolas will present to us a sample of their practice, with emphasis on geo-sourcing, bio-sourcing and reuse.

Prof. Dr. Guillaume Habert

Dr. Arnaud Evrard

ETH - Chair of Sustainable Construction
